Fractal Energy Masterclass Program Summary

OK guys, (which is a colloquialism from where I'm from that is gender-neutral!) I don't want to be overly redundant in this last module to reiterate everything that I've just hit you with over the last fourteen sections of this program. But I do have one question for you:

Where are you?

Have you fully been able to learn and apply all of the lessons that we've gone over in this program? You should feel that these are life-changing lessons, as I've just shown you how to dissect a price chart so that you have a very good chance of understanding what's happening "under the hood" of that market. If you don't feel that way, if you just feel confused and overwhelmed, then chances are fair-to-excellent that you've skipped some steps along the way and need further repetition.

Repetition is the Mother of Skill.

Slow down and enjoy the process. Go through the program again. If there is a book that I buy on Kindle which is particularly good, I'll take the extra step of ordering the hardback and I'll go through it again, marking it all up and making a mess of the pages. That's how you *internalize* something. Take the time and DIG for the answers yourself.

Again, if you have fully learned this system, then you're DONE. You will never have to learn another study or system again, regardless of what financial asset that you manage or trade. This is because all things "move" in the manner that I've described in these pages:

- Price moves in trends with HH/HL uptrends, or LH/LL downtrends.
- Price moves in Fractals; larger swings are comprised of smaller timeframe trends.
- Range expansion leads to range contraction, and vice versa.

That's it. Every market moves like this. And not just markets, every **THING** moves like this.

So if you're a little overwhelmed and confused, good. You're on the right path. Hard things offer the most value to unlock. Thanks for taking the journey with me.
